Subject: RE: Discuss next steps for glyphosate

FYI, I just got off the phone with Laura Beane-Freeman at NCI (who has taken over for Michael Alavanja since his retirement). Laura is well aware of the glyphosate controversy, has read the IARC & EFSA reports. She was non-committal on her personal views but was quick to comment that the EFSA report was rumored to have been written by Monsanto. She seemed to think the IARC was driven heavily by 'mechanistic data'?---what would that be?

NCI is actively working on an updated AHS review for glyphosate that will update 10 years more of tumor data & will use the newer exposure information. That work has just started & she does not expect a publication for at least 6 months.

She is interested in participating (or sending someone on her staff) in an EPA review of glyphosate cancer. I told her when I know more details about the workload/timing, I will call her back.

Anna

Anna B. Lowit, Ph.D.

Senior Scientist
Health Effects Division
Office of Pesticide Programs, USEPA
